Wireless Mesh Network.
Wired Reliability.

The Dust Networks LTC®5800 and LTP®5900 product families from Linear Technology are embedded wireless sensor networks (WSN) that deliver unmatched ultralow power operation and superior reliability. This ensures flexibility in placing sensors exactly where needed, with low cost “peel and stick” installations. The highly integrated SmartMesh® LTC5800 (system-on-chip) and LTP5900 (PCB module) families are the industry’s lowest power IEEE 802.15.4e compliant wireless sensor networking products.

Every Node Can Run on Batteries for >10 Years at >99.999% Reliability

- Routing Nodes Consume <50μA Average Current
- >99.999% Reliability Even in the Most Challenging RF Environments
- Complete Wireless Mesh Solution – No Network Stack Development Required
- Network Management and NIST-Certified Security Capabilities
- Two Standards-Compliant Families: SmartMesh IP (6LoWPAN) and SmartMesh WirelessHART (IEC62591)

Highly Integrated LTC5800 and LTP5900 Families
