

General Description

The MAX20419 is a high-efficiency, 3-output, low-voltage DC-DC converter IC. OUT1 boosts the input supply to 5V at up to 750mA, while two synchronous step-down converters operate from a 3.0V to 5.5V input voltage range and provide a 0.8V to 3.8V output voltage range at up to 3.6A. The boost converter achieves $\pm 1.9\%$ and the buck converters achieve $\pm 1.4\%$ output error over load, line, and temperature range. The IC features a 2.2MHz fixed-frequency pulse-width modulation (PWM) mode for better noise immunity and load-transient response, and a pulse-frequency-modulation mode (skip) for increased efficiency during light-load operation. The 2.2MHz frequency operation allows the use of all-ceramic capacitors and minimizes external components. The programmable spread-spectrum frequency modulation minimizes radiated electromagnetic emissions. Integrated low $R_{DS(ON)}$ switches improve efficiency at heavy loads, and make the layout a much simpler task with respect to discrete solutions.

The IC is offered with factory-preset output voltages (see the [Ordering Information/Selector Guide](#) for available options). Other features include soft-start, overcurrent, and overtemperature protections. The MAX20419 also has several redundancy and diagnostic features for compatibility with ASIL-rated applications.

Applications

- Advanced Driver-Assistance Systems (ADAS)
- Infotainment
- SoC Power

Benefits and Features

- Multiple Functions for Small Size
 - Synchronous 750mA Boost Converter
 - Fixed at 5V Output
 - Dual Synchronous Buck Converters up to 3.6A
 - Factory Configurable from 0.8V to 3.8V in 25mV Steps
 - Programmable Windowed Watchdog
 - 3.0V to 5.5V Operating Supply Voltage
 - 2.2MHz Operation
 - Individual RESET_ Outputs
 - High-Precision Performance
 - $\pm 1.9\%$ Output-Voltage Accuracy (OUT1) and $\pm 1.4\%$ Output-Voltage Accuracy (OUT2, OUT3)
 - $\pm 1.3\%$ OV/UV Monitoring (OUT1–OUT3, PV)
 - Excellent Load-Transient Performance
- Diagnostics and Redundant Circuits
 - ASIL C Compliant
 - Redundant Reference
 - Fail Safe on Open Pins
 - Shorted Pin Detection on $\overline{\text{RESET1}}$ – $\overline{\text{RESET3}}$
 - Input Overvoltage Detection
- Robust for the Automotive Environment
 - Current Mode, Forced-PWM, and Skip Operation
 - Overtemperature and Short-Circuit Protection
 - 24-Pin (4mm x 4mm) TQFN with Exposed Pad
 - -40°C to $+125^{\circ}\text{C}$ Automotive Temperature Range
