

Product/Process Change Notice - PCN 16_0268 Rev. -

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Appendix A) that you may have purchased in the last 2 years. **Any inquiries or requests with this PCN (additional data or samples) must be sent to ADI within 30 days of publication date.** ADI contact information is listed below.

PCN Title: ADuM3400/ADuM3401/ADuM3402 Die Revision, Data Sheet Change and High Voltage Test Platform Migration

Publication Date: 08-Feb-2017

Effectivity Date: 09-May-2017 *(the earliest date that a customer could expect to receive changed material)*

Revision Description:

Initial Release

Description Of Change

Die:

Increased pulse width of disable signal for refresh block. Increased separation between refresh high pulses and falling edge pulses. Increased minimum separation between refresh low edge pulses and rising edge pulses by increasing edge look ahead time.

Data Sheet:

Increased minimum operating voltage from 2.7V to 3.0V.

Test Platform:

The high voltage test platform used to verify the insulation performance of the ADuM3400/ADuM3401/ADuM3402 products during production will be migrated from the Harris-Tuvey 9464 to the Mess-& Prüfsysteme GmbH (MPS) PD test system.

Reason For Change

Die and Data Sheet:

To ensure continuity of supply through improved manufacturability.

Test Platform:

To maintain future continuity of supply and gain the ability to datalog high voltage production test measurements. ADI is currently relying on an aging high voltage test platform (Harris-Tuvey 9464) for the ADuM340x products.

Impact of the change (positive or negative) on fit, form, function & reliability

No change to fit, form, or reliability.

Devices will not be recommended for use with power supply voltages below 3.0V.

Summary of Supporting Information

Qualification has been performed per Industry Standard Test Methods. See attached Qualification Results Summary. Test correlation and validation has been performed, see attached test correlation report. Changes will be reflected in Rev E of the data sheet.

Supporting Documents
