

Product/Process Change Notice - PCN 19_0111 Rev. -

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Appendix A) that you may have purchased in the last 2 years. **Any inquiries or requests with this PCN (additional data or samples) must be sent to ADI within 30 days of publication date.** ADI contact information is listed below.

PCN Title: Laser Top Mark for TO Metal Can Packages assembled in ADI Hillview

Publication Date: 09-Jul-2019

Effectivity Date: 09-Jul-2019 *(the earliest date that a customer could expect to receive changed material)*

Revision Description:

Initial Release.

Description Of Change:

As part of continuous quality improvement program we will be converting the top mark from ink to laser on ADI (legacy Linear Tech) products in all TO metal can packages assembled in ADI Hillview.

Reason For Change:

Laser mark is more uniform, consistent and has better through put in assembly as compare to ink mark. The proposed change is applicable to all TO hermetic devices. A list of parts is included with this PCN.

Impact of the change (positive or negative) on fit, form, function & reliability:

This change does not affect form, fit, function and reliability of the products. Means no functional, parametric, mechanical, or datasheet specifications are affected and the component Bill of Materials remains unchanged. Similarly, there are no changes associated with the package footprint, PCB layout or product top marking layout, so the customer applications will be unaffected.

Product Identification *(this section will describe how to identify the changed material)*

Effective immediately to allow the laser mark as alternative for top mark, all TO packages in box stock with ink mark will continue for ship until depleted.

Summary of Supporting Information:

Qualification has been performed per mil-883 Industry Standard Test Methods. See attached Qualification Results Summary. Based on the results of Normal QCI testing for B + D testing as required by MIL-PRF-38535 Table A-I. Data is available if required.
