

PCN 20_0149A Correlation Plan – ADAS1010

Initial system setup will be verified with known good Set Up Verifiers (SUV units). These units will be tested in Greensboro then retested at IMI.

This test HW & SW is very simple and extensive correlation is not needed. As long as the SUV units pass, the system is ready for production testing.

ADI Greensboro	IMI	Approx Date
Test SUV units		3/10/2020
	Test SUV units	4/10/2020
Write final report		4/15/2020
