

Unlocking Innovation in European Defence and Critical Communications

The Catalyst; where collaboration on cutting-edge technology empowers Aerospace, Defence, and Communications in Europe to meet evolving challenges.

Building Ecosystems to help our customers accelerate their system level development and reduce risk

Unique environment to allow customers to **Collaborate, Innovate, and Solve** together with ADI

Providing customers with deeper access to ADI's technology, capability, and domain knowledge

ADI'S SYSTEM EVALUATION PLATFORMS INCLUDE

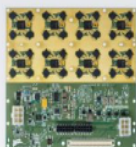

Apollo MxFE™
Workstation

KEYSIGHT

Ka-Band Phased
Array Development
Platform

X-Band Phased Array
Radar Development
Platform

Quad MxFE®
Development
Platform

ADRV9002
Workstation

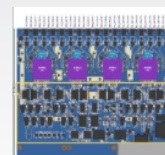

ADAR1000 Phasor
Development Platform

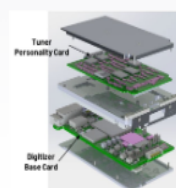

SYSTEM PLATFORMS COMING SOON

Apollo MxFE™
MCS Demo

Triton - Quad Apollo
Development
Platform

COTS Apollo MxFE™
3UVPX Digitizer

ADI's state-of-the-art innovation hub is located in Ireland. The ADI Catalyst provides a collaborative working environment for accelerating the development of mission-critical solutions.

ENGAGE WITH ADI
analog.com/catalyst

Sovereign Solutions

Increasing demand for high reliability, multi source manufacturing and European centric secure supply chains.

Evolving Battlefield

The connected battlefield will require innovation in signal intelligence, critical communications and advanced weapon systems.

Demand for Performance

Need for increased collaboration with trusted partners to develop advanced systems and improve Time to Market.
