

## Product/Process Change Notice - PCN 12\_0227 Rev. -

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Material Report). Any issues with this PCN or requirements to qualify the change (additional data or samples) must be sent to ADI within 30 days of publication date. ADI contact information is listed below.

**PCN Title:** Datasheet Specifications Improvement on AD8226  
**Publication Date:** 21-Sep-2012  
**Effectivity Date:** 21-Sep-2012 *(the earliest date that a customer could expect to receive changed material)*

### Revision Description:

Initial Release

### Description Of Change

Datasheet specifications on the following parameters will be IMPROVED. All listed specifications listed below will appear in Rev C of the datasheet.

#### AD8226ARZ and AD8226ARMZ

CMRR Gain of 1 with DC to 60Hz will be improved from 80dB to 86dB  
CMRR Gain of 10 with DC to 60Hz will be improved from 100dB to 106dB  
CMRR Gain of 100 with DC to 60Hz will be improved from 105dB to 120dB  
CMRR Gain of 1000 with DC to 60Hz will be improved from 105dB to 120dB  
Vosi will be improved from 200uV to 100uV  
Voso will be improved from 1000uV to 600uV  
PSRR Gain of 1 will be improved from 80dB to 100dB  
PSRR Gain of 10 will be improved from 100dB to 115dB  
PSRR Gain of 100 will be improved from 105dB to 120dB  
PSRR Gain of 1000 will be improved from 105dB to 120dB  
IOS will be improved from 1.5nA to 1.0nA  
Gain Error G=1 will be improved from 0.04% to 0.015%  
Gain Error G=1 to 1000 will be improved from 0.3% to 0.15%

#### AD8226BRZ and AD8226BRMZ

Vosi will be improved from 100uV to 50uV  
Voso will be improved from 500uV to 400uV  
PSRR Gain of 1 will be improved from 90dB to 100dB  
CMRR Gain of 10 with DC to 60Hz will be improved from 105dB to 106dB  
CMRR Gain of 100 with DC to 60Hz will be improved from 110dB to 120dB  
CMRR Gain of 1000 with DC to 60Hz will be improved from 110dB to 120dB  
PSRR Gain of 10 will be improved from 105dB to 115dB  
PSRR Gain of 100 will be improved from 110dB to 120dB  
PSRR Gain of 1000 will be improved from 110dB to 120dB

### Reason For Change

It is Analog Devices goal to continuously improve the products we manufacture. The AD8226 specifications have been dramatically improved as volume production data had become more readily available enabling better guaranteed device performance.

### Impact of the change (positive or negative) on fit, form, function & reliability

Positive change in guaranteed specifications

### Product Identification *(this section will describe how to identify the changed material)*

All models assembled post 1231

**Summary of Supporting Information**

No Qualification Required.

**Supporting Documents**      None

**For questions on this PCN, send email to the regional contacts below or contact your local ADI sales representative**
