PCN-2014-06-16

June 16, 2014

Dear Valued TRINAMIC Customer,

this is to inform you that a new firmware version **V1.31** has officially been released for the module

TMCM-6110

The module will be delivered together with this new release. Modules already shipped can be updated to this new release using the firmware update feature of the TMCL-IDE via serial interface. The new firmware and updated documentation will be available for download from the Trinamic website. Prior releases are still available on request. If you have any questions, please contact your sales partner.

Firmware Changes (compared to V1.26):

- Changing the CAN interface parameters via USB works without problems
- Better performance of the target reached event
- New global parameter for changing the direction of all motors

This change is classified as a minor change.
