**Re: PFOS/PFOA General Statement**

To Whom It May Concern:

Analog Devices Inc. (ADI) products, to the best of the Company's knowledge and after good faith inquiry, do not contain Perfluorooctane Sulfonates (PFOS) and Perfluorooctanoic Acid (PFOA) above the indicated levels set forth in the EU Directive 2006/122/EC (30th amendment to EU Directive 76/769/EEC) and are therefore compliant with the said Directive.

Under this Directive, the restriction on the use of PFOS and PFOA as a photoresist or anti-reflective coating for photolithography process during wafer fabrication shall not apply and is exempted under Annex1 Section 3(a) of this amendment.

The information on ADI products in this letter is based upon the information provided by the material suppliers and assembly manufacturers used by ADI to manufacture these products. As such, ADI makes no independent representations or warranties, expressed or implied, and assumes no liability in connection with the use of this information.

Thank you for your interest in ADI products.
