ACKNOWLEDGMENTS

Thanks are due the many technical staff members of Analog Devices in Engineering and Marketing who provided invaluable inputs during this project. Particular credit is due the individual authors whose names appear at the beginning of their material.

In addition to authoring much of the material, Walter G. (Walt) Jung acted as primary technical reviewer. His comments and revisions have added much to the accuracy and clarity of the text and diagrams.

Linda Grimes Brandon of Brandon's WordService prepared the new illustrations and typeset the text. Ernie Lehtonen of the Analog Devices' art department supplied many camera-ready drawings. Judith Douville compiled the index, and printing was done by R. R. Donnelley and Sons, Inc.
