

Constant-Voltage, Constant-Current DC/DC µModule Products

Our constant-voltage, constant-current (CVCC) µModule® regulators provide accurate input current limit in applications such as Peltier devices for cooling and heating, battery and supercapacitor chargers, LED and laser drivers, and motor and fan controllers. These products include a DC/DC controller, MOSFETs, inductor and supporting components in an LGA or BGA package. Only a few resistors, the bulk input and output capacitors are required to complete the design.

Peltier Driver

LTM8064

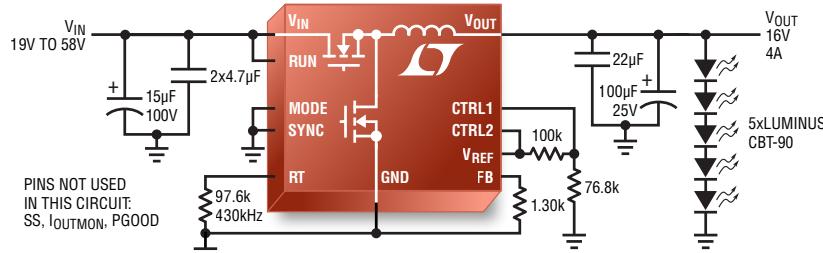

Two LTM8064s Used to Regulate Positive or Negative Voltage (and Current) Across a Peltier Device

LED Driver

LTM8064

Step-Down 4A Drive with Five White Series LEDs

Battery Charger

LTM8056

14.4V, 3A Lead-Acid Battery Charger Input Current Limited to 2A
